DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 10, 18 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Lambert (6,471,142 B1).

Lambert discloses a fuel injection device for an internal combustion engine, the injection device comprising a housing, a recess (11) provided in the housing, at least two valve elements (12, 14) disposed coaxial to each other in the recess (11), each of the valve elements cooperating with a corresponding valve seat () and each being associated with at least one corresponding fuel outlet opening (8, 9), and a shared valve device

(106) having at least three switched positions (3-way valve) and being operable to influence the position of the valve elements (8,9).

Regarding claim 18, wherein the one valve element (12) functions in a pressure-controlled manner and the other valve element (14) functions in a stroke-controlled manner.

Regarding claim 23, wherein the pressure- controlled valve element (12) is disposed radially outside the stroke-controlled valve element (14).

Allowable Subject Matter

3. Claims 11-17,90-22 and 24-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show dual mode fuel injectors.
